INTRODUCTION

CORE MINING NETWORK

Blockchain technology has brought the future of investments to everyone. No longer do you have to have \$10000+ in your bank account to be able to earn a residual income, invest and profit. No longer do you have to have an account with a minimum starting capital with some bank owned company and good credit to start investing.

Cryptocurrency allows anyone with any currency to invest in crypto.

With all the platforms out there, blockchain investments is catered to everyone's wallets. Unlike stock market investments who are controlled by the rich and the governments.

Blockchain is by the people for the people just like the government except the difference is, no government control. There are always going to be nay-sayers and because cryptocurrency is so new, founded around 2009, many governments and banks are scared to enter the market but are slowly doing so anyway.

We are paving the road for a new investment strategy for everyone.

BUSINESS MODEL

CORE MINING NETWORK

Investment organization, investing in green companies from solar mining, technology, schools, research, development, hydroponics and aquaponics farming, solar power and wind farms.

CMN has built a safe investment model, you can not lose money, only gain*. Instead of investing \$1000 on your local or crypto trading platforms, you may gain some but also lose big., you can turn to a safer investment strategy. One that earns you a constant increasing income.

Buy investing in CMNT you are not buying a meme coin, you are buying into a part of owning CMN. Every CMNT is worth a percentage of the company in profits. The more investments CMNT enter in to and profit, the more earnings your staked tokens will return.

No CMNT will ever be locked in a pool. You have free hands to move, trade, sell CMNT at your will. Every CMNT has a percentage value of profits stake at CMN.

Why will we succeed when so many others have failed? The easy answer is, we have real assets backing us. This is not a meme coin, CMNT is backed by real world assets working for you. The mining network generates income, the token will automatically have value due to this and increase in value as the return on the token itself grows monthly. Every single CMNT token has a miner working for it.

How can we have such high returns? Mining today brings in very good returns if you know what you are doing and we have been in the crypto mining scene for more than 8 years. 0 CMNT tokens are distributed to Core Mining Network. That means all tokens are being offered to the public. We only rely on the functioning of the company and income from here to expand and grow. 700 million tokens will be sold out through the ICO and the rest will be put on exchanges at a specified date.

ABOUT CMN

CORE MINING NETWORK

As any other investment company we build wealth for our investors. Our business model is unique in the sense that by investing in Core Mining Network by purchasing CMNT tokens, you become a voice in the company. It works as a collective, many minds are better than one. No longer do you have to rent miners to earn Bitcoin. No longer do you have to purchase the infamous Ebay mining contracts where they have you pay for a contract to earn Bitcoin to only receive 60% of what you invested. CMN works in a different manner where you own a percentage of the miners for life as long as you own the CMNT token. You will earn an interest on the amount you invested, at time of writing anywhere from 30% to 60% depending on market value of Bitcoin and to top it off, 20% goes back into reinvestment to the company. This means every month we invest in new miners that gets added to the pool and with every new miner comes more profits that automatically gets added to your gains. The longer you stay, the more gains you will make and the best part is, you get the payouts in Bitcoin, yes BITCOIN! No meme coins.

This is a first in investment strategy. We work for the investors.

We are working on plans to go completely green with solar panels and wind power. The best part is that the solar and wind power network we are building will not only eventually power all the mining facilities we have but also produce electricity for sale at discounted prices to surrounding areas. This means that you as an investor would also receive profits from the electricity farms once built. It doesn't stop there! Any projects we invest in, voted by you as an investor, and profit from will gain you profits automatically just by holding CMNT tokens. We have a voting system we are working on where investors will vote on new projects that will bring in profits to the company. Any and all profits after expenses that Core Mining Network bring in will be distributed to all the Core Mining Network token holders.

You are part of the company, a new beginning, a new standard in investing. Share the wealth with the investors is our motto. We have been experimenting for a while with this new type of investing strategy and it works. As a matter of fact, it works so good that large corporations use it in their top circles. This is why you see CEOs and upper managements with hundreds of millions of dollar salaries. One person does not need that much income. An average person can live an incredible life on a million a year. Why not take the rest of the 199 million and reinvest in the company to produce more profits to the investors/workers/employees. The problem with these large companies is greed. This is where Core Mining Network is different. Spread the wealth, grow together.

PROFIT DISTRIBUTION CORE MINING NETWORK

How does it work? In short, Core Mining Network Token (CMNT) is sold at the initial coin offerings. There are 3 coin offerings for a total of 700.000.000 CMNT's. The first ICO will allow you to get in on the project early. The price of the first ICO is only \$0.20 per CMNT. There will only be a total of 300.000.000 CMNT's distributed through the first ICO. The second ICO will be released at \$0.25 for a total of 200.000.000 CMNT's. The last ICO will be 200.000.000 CMNT's at \$0.30 each.*

What happens after the ICO is done? Then we are in full production. We will distribute 300.000.000 CMNT's with an initial Exchange List price of minimum \$1 depending on the voting system. You as a token holder will vote on the initial price when listing on Exchanges. This will create new income opportunities from various green projects such as Hydro and Aqua ponics farms, Solar Power centers, Programming as well as research. Remember CMNT will be a lifetime income, the more income opportunities we implement, the more income each and every single CMNT will produce. The project you vote on will earn an income from CMNT for life as long as it is profitable. No tokens will be distributed to the owners at any time unless they purchase them @ the ICO. To make it simple, owners of CMN only profit if the business is profitable and so far the concept is very profitable. If the cryptocurrency market completely collapses it may become unprofitable.

Who will be able to earn profits from these projects? Anyone who own's a CMNT will earn from any and all projects. The more CMNT you own, the higher your monthly profits will be. Every CMNT is divided up into a percentage of the profits generated. Not only will you get an income from all the projects but we expect CMNT to increase in value very fast with a steady future growth.

Why do you think CMNT will increase in value? This is not a meme coin going to the moon and then crashing. This is backed with real companies, projects, innovations to bring you a steadily rising income to every CMNT holder. By holding CMNT on our platform you will earn an increased monthly income. CMNT token will automatically be worth more as the token increases in income every month with new projects and companies. Think of CMNT as an income token, the longer you hold it the more value you can receive from it and the more earnings you will receive in your pocket.

Why is CMNT a better investment opportunity than day trading and market investments? If you buy a token on the cryptocurrency market or regular stock market. You have to SIT on it for a very long time and if everything goes right, 10 years down the road you may have earned a small profit. As everyone knows, sooner than later, most people loose on this investment and only the super rich with insider information are the ones that make any worthwhile gains. CMNT will increase in value constantly with new projects earning increased profit shares to CMNT. Here's the thing, not only will CMNT increase in value but CMNT owners will also receive monthly earnings from the profits associated with CMN.

* At the time of writing the contract, 1 BNB = 2000 CMNT

PROFIT DISTRIBUTION

CORE MINING NETWORK

How do you as a CMNT holder receive payouts? Payouts are normally done at the end of the month* through BTC or another currency that has a low transfer/exchange rate. Ethereum gas prices are normally ridiculously high and not worth while converting BTC etc.

Any investment projects CMN is invested in, any profits after expenses will be distributed to CMNT holders. The profits of any investment projects are divided into 3 major categories. The 3 categories include,

- Future investments of the project
- Loss factors
- Profit Sharing

* Can vary depending on project costs.

* There will be a minimum of 0.01 BTC payouts

Payouts are done on a monthly basis to every CMNT owner who has staked the CMNT coin with the CMN Platform. Your linked pay out Bitcoin address will receive the profit sharing payouts on a monthly basis. So the BTC payout will go directly into your wallet. Once you signup and invest your CMNT you will be asked to add a BTC payout address as all funds at this time of writing are paid out in BTC. If there is a more profitable coin in the future we would pay out in that particular form.

We dont just provide rewards for our holders, we provide a constantly growing return. A fund you can retire on and share with family and members. You dont have to be a whale to take part in a profitable future. Not only can you get rewarded for as long as you own CMNT you will also be able to trade it on major exchanges world wide.

ROADMAP

CORE MINING NETWORK

STAKING PLATFORM

JULY 1ST 2022

STAKING CAN BEGIN FOR ALL TOKEN HOLDERS.
PROFIT SHARING IS BEING DISTRIBUTED AND THE VOTING
SYSTEM IS OPENED UP TO THE TOKEN HOLDERS.

CMNT WILL BE LISTED TO THE LARGER
EXCHANGES SUCH AS GATE.IO,
BINANCE.COM AND BINANCE.US

MARKETS

CORE MINING NETWORK

We are investing in not only mining but also other green markets as disclosed under the About section. Having multiple profitable investment streams and not just relying on a single source of profit is a long proven strategy that works. With our investment advisors together with our CMNT holders we strive to find only the most profitable but also most green investments. We will also strive to create jobs with our investment opportunities. Our vision is to provide a safety net for our members and a financial freedom to never have to worry about paying that next bill or having enough money to purchase a new car or house. To be able to plan for an early retirement and enjoy life of it's all wonderful features it brings us and not have to grind away life at an early age. This is the time when your supposed to enjoy life as a whole.

Our main objective is to create a constant residual income that you can pass on to family and friends. We are trying to build a future of a steady income not by hoping a stock market will carry the profits but backed by real companies, real people and real assets. Instead of hoarding the profits our business plan is to distribute most of the profits to our token holders and only use what is needed to run the company profitable and able to expand. This is why we are able to offer anywhere from 50% and more in growing returns. The difference between this model and regular companies is that they will hoard profits and only distribute a fraction of the profits to their members, then the managements and ceo's distribute the major bulk of the profits amongst themselves, not to the company or the people who made the company able to exist. We are for the members not for greed and believe in returning the profits to the rightful owners. Areas of potential investment include but do not confine to the following areas. We are always looking for good investment opportunities.

<i>CRYPTOCURRENCY INDUSTRY</i>	<i>TRANSPORTATION INDUSTRY</i>
<i>PROGRAMMING INDUSTRY</i>	<i>SPACE INDUSTRY</i>
<i>TECHNOLOGY INDUSTRY</i>	<i>MEDICAL INDUSTRY</i>
<i>AGRICULTURAL INDUSTRY</i>	<i>GREEN ENERGY SECTOR</i>
<i>Areas we will not consider investing in include,</i>	
<i>FOSSIL FUEL INDUSTRY</i>	
<i>MILITARY OR WEAPONS INDUSTRY</i>	

STAKING

CORE MINING NETWORK

The staking environment will involve staking your CMNT's on our staking platform. The profit sharing will be distributed in accordance to the amount of CMNT's you have staked on the platform and be a percentage of total CMNT's staked on the platform.

Any total profits earned previous month will be distributed to the staking holders BTC wallets assigned on signup to the staking platform. You may only have 1 BTC wallet address registered at any one time. You may change the BTC wallet address at any time. Funds distributed to the BTC wallet address are not held on the staking platform. Minimum distribution of profits to a wallet is set at this time to 0.001BTC. Furthermore, no CMNT's are ever locked but must be presently staked for the entire month to receive the profit sharing. If tokens are removed before the profit sharing payout date, the profit sharing payout will be redistributed into the profit sharing payout pool.

The staking page will hold the total profit sharing payout information indicator and date of next coming payout as well as history on previous payouts and amounts, total staked CMNT's and vital other exchange data.

THE TEAM

CORE MINING NETWORK

CEO	CEO
Michael Csaky	Bjorn Smeds

We are always looking for new talent. If you feel you can be an asset to Core Mining Network, please feel free to contact us @ Support@coremining.net. We have a full team but are always looking to expand in both the technology and economical sectors.
